EXPERIENCE

ZOLA.COM

Front End Engineer I

Mar 2022 - Oct 2023

- Collaborated with cross-functional teams including developers, designers, and project managers to deliver high-quality web applications within the project budget and timelines.
- Designed and implemented dynamic and responsive web pages using ReactJS and TypeScript.
- Utilized kanban methodologies to manage the development process and ensure timely delivery of the project.
- Manage website development projects from design hand off through completion, optimizing all cross-browser and multi-platform compatibility

Junior Front End Engineer

Apr 2021 - Mar 2022

- Utilized Redux to manage and maintain complex application state in a scalable and predictable way.
- Worked closely with back-end developers to ensure seamless integration between the full-stack and back-end systems.
- Collaborated with product and designers to create visually appealing and intuitive user interfaces.
- Provided technical support and resolved bugs and issues in a timely manner.

Engineering Intern

Nov 2020 - Apr 2021

- Work closely with programmers and business stakeholders to meet project requirements, goals, and desired functionality.
- Implemented enhancements that improved web functionality and responsiveness.
- Participated in code reviews and provided feedback to my fellow developers.
- Managed updating SEO keywords & content blocks, increasing organic traffic and achieving and SEO score of 100

GENERAL ASSEMBLY

Software Engineering Fellow

May 2020 - Oct 2020

- Participated in 500+ hours of applied training in software engineering and web development concepts focusing on frontend and backend development.
- Built five full-stack applications and websites using HTML, CSS, JavaScript, React.JS and Ruby on Rails
- Collaborated with UX Designers and Software Engineers to create full-stack web applications for stakeholders.

PROJECTS

[Copped](#) | *React , React Bootstrap , Ruby on Rails , PostgreSQL*

- Developed a full-stack web application designed for “sneaker heads” using Ruby & PostgreSQL on the backend and React as the frontend
- Implemented authorization allowing users to create an account and create custom posts about their recent “cops”

[Breathe](#) | *React , Express , MongoDB , React Bootstrap*

- Collaborated with 3 other teammates to build a mental health matchmaking application helping users find an app, or medical professional based on their filtered parameters.
- Led as the frontend developer on team, which involved designing the user experience, implementing 7 landing pages using Javascript, HTML and CSS, troubleshooting UI bugs

EDUCATION
